[illegible]

1. Demonstrate At Least 2 Different Entries with Different Aids

- Eyes up and forward on entry
- Control of aid on entry

2. Entry With Aid and Swim 25 m or yd Head-up Front Crawl or Breaststroke. Assume Ready Position and Demonstrate Ability to Scull Forward, Backward and Turn

- Control of aid on entry
- Eyes above the surface during swim
- Basic arm and leg mechanics
- Distance completed non-stop
- Ready position with effective support scull showing ability to move forward, backward and turn

3. Demonstrate Defence Methods from the Front, Side and Rear

- Avoidance of grasp(s)
- Ready position at a safe distance
- Constructive communication
- Treading water throughout

4. Demonstrate Eggbeater Kick Showing Ability to Travel, Change Direction and Height Levels

- Vertical body position
- Movement pattern of kick resembles whip kick with alternate leg action
- Drive with knees apart; feet wider than knees
- Head above surface throughout; change in height on command
- Travel 1-2 m or yd in any direction

5. Carry a 4.5 kg (10 lb) Object 25 m or yd Using Swimmer's Choice of Lifesaving Kick

- Basic lifesaving kick mechanics with control of direction
- Distance completed non-stop
- Head remains above the surface

6. Demonstrate the Removal of an Unconscious Victim with the Assistance of an Untrained Bystander

- Clear and appropriate direction for bystander
- Appropriate choice of removal
- Safe removal without injury to rescuer, bystander or victim

7. Head-up Approach into Head-first Surface Dive to a Maximum Depth of 2 m Swim Underwater for 5-10 m or yd and Surface. Foot-first Surface Dive (max depth 2m) Recover an Object and Return It to the Starting Point

- Eyes up and forward on approach
- Vertical descent
- Travel in designated direction
- Eyes open underwater
- Object recovered and returned
- Arm extended above head on ascent

8. Demonstrate in Shallow Water, the Ability to Turn a Victim Face-up and Support the Face Above the Surface

- Victim's face supported above surface
- Airway maintained throughout; water prevented from entering victim's nose or mouth
- Victim quickly secured at nearest point of safety

9. Swim Each of the Following Strokes 100 m or yd: Front Crawl, Back Crawl, Breaststroke

- Minimum Distance completed (for each stroke)
- Front Crawl
 - Alternate arm action with overarm recovery and underwater pull
 - Hand entry beyond shoulder, pull past hip
 - Alternate leg action drive
 - Rhythmic kick
 - Regular breathing pattern to side with underwater exhalation
 - Continuous propulsion
- Back Crawl
 - Alternate arm action with overarm recovery and underwater pull
 - Hand entry beyond shoulder, pull past hip
 - Alternate leg action drive
 - Rhythmic kick
 - Continuous propulsion
- Breaststroke
 - Symmetrical arm recovery and drive
 - Regular breathing pattern with underwater exhalation
 - Both legs kick at same time and recover at the same time
 - Drive with knees apart; feet wider than knees
 - Continuous propulsion

10. Complete a 600 m or yd Workout At Least 3 Times During the Training Course.

- Warm-up:
 - 25 m or yd Lifesaving kick,
 - 50 m or yd Back Crawl,
 - 50 m or yd Breaststroke,
 - 50 m or yd Front Crawl
- Stroke drills:
 - 5 x 25 m or yd Instructor's choice
- Work Set:
 - 4 x 50 m or yd on 90 sec Instructor's choice
- Cool down:
 - 100 m or yd Swimmer's choice
- Workout is completed at least 3 times during the training course
- Ability to locate pulse and count beats per minute
- Ability to adapt pace in accordance with desired heart rate target

11. Swim 300 m in 9 min. or Better (300 yd in 8:00 min) Using Any Stroke or Combination of Strokes of the Swimmer's Choice

- Recognizable stroke(s) used
- Distance completed with a uniform pace
- Time limit met or bettered

12. Demonstrate the Recognition and Care of a Bone or Joint Injury

- Assessment of environment for hazards
- Establish responsiveness
- Recognition of injury based on pain, obvious deformity or swelling and the probable cause
- Movement of injury minimized to prevent further injury
- If available, ice applied to injury site
- EMS activated if necessary

13. Demonstrate the Recognition and Care of a Victim Suffering Respiratory Distress from Asthma or Severe Allergic Reaction

- Assessment of environment for hazards
- Establish responsiveness
- Determination of cause (and removal if possible) of emergency
- Victim placed in most comfortable position
- Victim assisted to find and use medication (asthma inhaler or epinephrine auto-injector)
- Activate EMS if necessary

14. From 3 Different Heights or Positions, Locate and Describe an Object Located on the Bottom or Below the Surface

- Ability to identify the barriers to recognition
- Move to a position to enable candidate to best "see" the object

15. Perform a Rescue of a Weak or Non-Swimmer with a Towing Aid. Swim Approach 20 m or yd and Tow Victim to Safety Showing Ability to Avoid Contact. Rescuer Performs Appropriate Follow Up Procedures, Including Treatment for Shock

- Quick accurate recognition
- Personal safety maintained
- Appropriate assessment of situation
- Call for help
- Appropriate choice and use of aid
- Appropriate entry and efficient approach
- Appropriate choice of tow for the circumstance
- Victim secured at nearest point of safety
- Appropriate care of victim and follow-up
- Visual contact and constructive communication throughout
- Appropriate use of bystanders when available
- Victim observed/reassured until rescuer relieved of responsibility
